PROFILE

I am a 4th year student currently studying mechatronics engineering at the University of Cape Town. I love expanding my skills as a future engineer and have a love for anything related to coding, automation ,power controls,signal processing etc. I am a fitness freak and love working with people

SKILLS

- PYTHON
- C
- MATLAB
- JAVA
- MAKING PCB's
- STRONG COMMUNICATION
-

EXPERIENCE

2022

Worked as maths and physics tutor in a school that delivers tutoring to high school students in disadvantaged backgrounds

2023

built a water level detector that senses the level of water at 3 different water levels ,to help people with vision impairment.

2025

Built a charging module pcb for a micromouse.
Created a maze-solving algorithm for a micromouse project
Built a website that provides free access to internships and learnerships to students and graduates in South Africa

2026

Built a power management system for a sensing bouy system meant to be deployed in the antarctic to aid gloabal warming data

EDUCATION

SECONDARY SCHOOL

Boksburg high school
2018 - 2022

BSC MECHATRONICS ENGINEERING

University of Cape Town
2023 - 2026

ACHIEVEMENTS

- Awarded position of senior mentor at the University of Capetown
- Completed 4 out of 5 years of mechatronics engineering at the University of Cape Town
- Deans list student for 2 years consecutively
- senior RCL in highschool
- valedictorian in highschool
- best maths and physics student in high school
